

PRESS RELEASE

The most scalable and featured network monitoring software, delivered at a commodity price.

Las Vegas, Nevada – April 2015 – AKIPS Network Monitor – Interop 2015 Las Vegas

AKIPS continues to lead as the market disruptor for the network monitoring industry. The only network monitoring system to offer one low commodity price, independent of the size of your network, is available for download.

AKIPS Network Monitor was developed by innovative Australians.

The software, made down-under:

- provides you with 100% visibility across your network;
- runs on a Virtual Machine;
- has no licensing limitations on any technology (e.g. devices, interfaces, MIB objects, Netflow, Syslog, Traps, etc);
- has built in alerting to warn of possible network outages; and
- is available at a commodity subscription price that packages support, group training and delivers on users requirements.

AKIPS is available for businesses with any size network and has discounted subscription rates for schools in the K-12 category and Colleges/Universities. AKIPS also promotes a free version of the software for upcoming network management students to learn all about networking by understanding what's going on via AKIPS monitoring software.

The innovations that Australian's have delivered over the years is impressive. They positively touch our lives on a daily basis. These include: Google Maps, the Black Box flight recorder, heart pacemaker, bionic ear, the refrigerator and electric drill, not to mention the Hills Hoist and Victa Mower. AKIPS Network Monitor joins the list and looks forward to release further innovative enhancements throughout 2015. We hope your life will be benefited by the innovation that AKIPS Network Monitor delivers.

Visit akips.com and you will have it installed in 10 minutes on your enterprise network.

AKIPS: "Always Keep IT Purely Simple"

For the non-technical audience:

AKIPS Network Monitor is a great Australian innovation designed for any size network to make network monitoring a breeze. Check it out at www.AKIPS.com

The list of Australian innovations also includes the surf ski, ute (motor vehicle), zinc cream, solar hot water system, ultrasound machine, wine cask, orbital engine, polymer banknote, cervical cancer vaccine, plastic spectacle lenses and Wi-Fi. Oh, not to mention the Boomerang!

AKIPS Network Monitor is on show this week at Interop Las Vegas 2015. Visit Stand 2434. Mandalay Bay Convention Center. Download it now at www.AKIPS.com

AKIPS provides 100% visibility across any size organisation. From a single VM, AKIPS is the only scalable, cost effective solution that monitors over one million interfaces at one minute resolution, with IPv6, SNMPv3 encryption, Netflow, syslog, wireless monitoring, and trap collection. Designed and engineered in Australia.
