

PRESS RELEASE

The most scalable and featured network monitoring software, delivered at a low cost subscription.

Brisbane, Australia – August 2015 – AKIPS Network Monitoring Software – FREE Training

In conjunction with AKIPS authorised training partner Klarity, an invitation is extended to all USA / Canadian based IT Network Engineers/Managers and related personnel to attend a free webinar to introduce you to the latest release of AKIPS Network Monitoring Software.

Sessions aimed at new users and people evaluating AKIPS include:

- Introduction to AKIPS Network Monitor: Topics covered: How AKIPS works; What AKIPS monitors and collects; How to drive the user interface; Introduction to the various menus, Dashboards, Reports.
- Driving AKIPS – User Interface Training: Topics covered: How to drive the user interface; Introduction to the various menus, Dashboards, Reports and Tools; Using the time filters; Using the Device, interface and event filters.

Other sessions are for AKIPS subscription customers, covering topics of interest to 'admin' level users.

Mark Birkinshaw, Chief Marketing Officer says “the webinars will display the functionality of AKIPS to benefit your business. Network Managers will see first hand that the AKIPS offering eclipses legacy solutions such as Solarwinds, SevOne, Statseeker, PRTG, etc.” Put simply, AKIPS:

- Scales & monitors more: SNMP, Ping, Syslog, Traps, Netflow, across hundreds of vendors
- Includes switch port mapping: easily locating IP and MAC addresses
- Displays 3 years of graphical statistical history at 1 minute resolution: No data roll up
- Includes configurable threshold alerting, event and dashboard reporting
- Is fully compliant with SNMPv3, IPv6: securing and future proofing your network
- Installs in a VM: saving you costly associated hardware and maintenance expense
- Includes performance metrics: routers, switches, firewalls, APs, controllers, load balancers, etc
- Comes complete with access to training, support, user forum: quickly allowing your team to benefit from using AKIPS software.
