

Number 27 – March 7<sup>th</sup> 2018

## PRESS RELEASE

*AKIPS at CiscoLive Melbourne 2018*

**Melbourne, Victoria, Australia – March 7<sup>th</sup> 2018** – AKIPS is once again exhibiting at CiscoLive Australia, in Melbourne. This year the whole team are on hand for the 25<sup>th</sup> Anniversary of Cisco Live and Cisco Networkers.

The AKIPS team hope to expose AKIPS to many more customers at the exhibition. Every business, in every industry, with a network can benefit from the visibility AKIPS provides, inclusive of all the detailed metrics, reporting and alerting that will keep them abreast of issues in near real time.

AKIPS is truly the worlds most scalable Network Monitoring Software capable of efficiently polling and profiling extremely large networks with ease. AKIPS is an integrated network monitoring suite with coverage of SNMP, Syslog and Netflow. It collects detailed network metrics, provides an industry leading 60second baseline and presents actionable alerts to ensure networks are running at their premium.

CTO, Nicholas Frampton summarises the offer as

“AKIPS provides a clear path for businesses to trial the software on their network.

Simply download a copy from the website, install it in around 5 minutes, request an evaluation key to access the full suite of software and we will through-in comprehensive training for your entire team. All without obligation!

Once network engineers and managers witness the benefits AKIPS provides, they simply become a licensed customer by investing via a low cost annual subscription.

It really couldn't be any simpler!

**AKIPS** is an innovative Australian company which engineers, designs and develops network monitoring software focused on user experience, speed, and scalability. AKIPS runs from a single virtual machine on customer premises, automatically discovers wired and wireless networks, identifying and monitoring vital performance metrics out-of-the-box for hassle-free use. Protocols: SNMPv3, IPv6, syslog, NetFlow/IPFIX, etc.
