

PRESS RELEASE

AKIPS at Cisco Live Melbourne 2018

Melbourne, Victoria, Australia – March 8th 2018 – 25th Anniversary of Cisco Live and Cisco Networkers.

AKIPS are joining in the silver anniversary celebrations commemorating 25 years of Cisco Networkers, now known as Cisco Live in Australia. Exhibiting at the World of Solutions expo, CEO, Paul Koch has many stories about his experiences at Cisco events over the years and great friendships made. "It's a community that feels like family, having shared the IT journey from mainframe, to desktop to mobile over a generation. Our team are always catching up to share experiences with customers as they are the centre of our focus.

Networking is an industry in demand through all technology disruptions. AKIPS Network Monitor is the embodiment of a lifetime of experience in the industry and has been optimised to perform given today's massive demand on computing resources and desire for full visibility of network traffic."

The AKIPS team is united in its philosophy of Always Keep IT Purely Simple. If technology is to be mastered and understood, then you need to clear, accurate metrics that are presented in an actionable format. This philosophy is not only evident in the design, GUI and backend smarts of AKIPS Network Monitor Software, it also drives business planning and growth to adapt to a fast-paced challenging marketplace.

A prominent global betting agency monitors its Australian operations with AKIPS. Their lead network engineer speaks highly of the tool and recently commented that "AKIPS has become a mission-critical piece to ensure rock-solid network availability, particularly around Melbourne Cup, which is the highest-grossing day of the year for us. AKIPS gives us full visibility into our firewalls and load balancers. Its super-fast reporting helps us rapidly pinpoint trouble spots across our network infrastructure, ensuring we keep our customers happy."

AKIPS is an innovative Australian company which engineers, designs and develops network monitoring software focused on user experience, speed, and scalability. AKIPS runs from a single virtual machine on customer premises, automatically discovers wired and wireless networks, identifying and monitoring vital performance metrics out-of-the-box for hassle-free use. Protocols: SNMPv3, IPv6, syslog, NetFlow/IPFIX, etc.
