

PRESS RELEASE

AKIPS exhibiting at Gartner Catalyst Conference 2019- #GartnerCAT

San Diego, California, USA – August 12th 2019 – AKIPS is participating at the Gartner Catalyst Conference 2019 being held in San Diego, CA, August 11-15. The Gartner Catalyst Conference is a deep dive into technical trends and topics that are the most challenging, offering a dynamic live context where you can ask questions, vet ideas and proactively problem-solve. At the Conference, attendees will examine the latest emerging trends and how to improve productivity with cloud- native apps and platforms, blockchain, enterprise apps and app architecture, AI and advanced analytics, data management and integration, DevOps, and more in order to position their enterprise for digital success. With attendance of over 2000 peers, AKIPS is demonstrating their enterprise network monitoring software.

CTO Nick Frampton acknowledges: “The Gartner Catalyst Conference is ideally suited to showcasing AKIPS as the conference provides opportunities to learn and obtain technically focused, pragmatic, ‘how-to’ content. AKIPS meets the needs of the Network Engineer by delivering network performance metrics and alerting, while providing the reporting required by CIOs and Network Managers to ensure the business is operating optimally. Our team is always available for complimentary webinar training.”

AKIPS CEO Paul Koch says: “The Gartner Catalyst Conference is designed to provide a blueprint for project planning and execution. AKIPS always keeps it purely simple to execute on strategy and implementation of network performance monitoring. AKIPS is the only monitoring software that scales to monitor, analyse, report and alert on the increasing demand for performance metrics of your network infrastructure.”

AKIPS is an innovative Australian company that develops network monitoring software focused on positive user experience, speed and scalability. AKIPS runs from a single server on customer premises, automatically discovering wired and wireless networks, identifying and monitoring vital performance metrics out-of-the-box for hassle-free use.
